Why Community Energy Matters?

- Citizen-owned energy systems are increasingly recognised as a key driver of a just energy transition towards renewables
- Enables equitable local sharing of value generated from RES, increases local prosperity & energy security
- Accelerating RES uptake is critical in enabling green energy transition and moving the region towards climate neutrality.

DECA's Main Goals

1. Build capacity for local community energy initiatives.
2. Provide tested solutions for the creation and scaling of community energy projects.
3. Sustain acceleration support for community energy action through national hubs and a regional alliance across the Danube region.

HOW WE WORK?

DECA partners cooperate in co-designing and testing solution concepts in local environments; we improve materials based on local feedback and disseminate solution blueprints for up-take and scaling across the region.

Our Offer:

- TRAINING PROGRAMME
- TOOLKIT FOR PROJECT DEVELOPMENT
- STRATEGY FOR SUSTAINED SUPPORT
- CONTINUOUS KNOWLEDGE SHARE

IMPACT

By empowering communities, DECA is helping to activate and strengthen a new type of renewable energy player. One that can drive:

- Clean Energy Transition
- Just Transition
- Affordable and secure energy from local sources
- Local value creation
- Communities Resilience

BETTER POWER and EMPOWERMENT for a sustainable energy future.

CONTACT

Thank you.

How to get involved?

Join DECA activities, support energy communities, advocate for better policies, and implement sustainable solutions in your region.
