„Modern and successful“ Slovakia

- August: Discussions with 100 experts = webinar + meeting + collecting responses
 - Untransparent division;
 - Unclear process
- **5 Oct: Reform menu** - Presented measures for EUR 25,5 billion + TBD (EUR 5,8 billion available)
- RRP from 2 other coalition parties and at least one opposition paper
- Events and Conference in December
- RRP to be finalised in February

Components - selection and prioritisation

Coalition agreement on supporting:

- Green renovation of buildings (incl. fossil gas boilers or heat pumps)
- Railway transport
- Decarbonisation of industry and alternative fuels (risks of hydrogen, fossil gas, not applying 'polluter pays principle')

Components to be added:

- Building regional capacities for planning energy and climate projects
- Water – adaptation measures – grey vs. green
- Connecting public transport and bicycle infrastructure
- Circular economy

Template - Renovation wave

Template

1. Description of the component

Objective:

Examples of reforms and/or
investments:

Estimated cost:

2. Main challenges and objectives

3. Summary description of the reforms and investments of the component

4. Green and digital dimensions of the component

5. Milestones, targets and timeline

6. Financing and costs

Renovation wave - discussions

What is the goal?

- Decrease of GHG?
- Decrease of kWh?
- Frequency of use of deeply renovated buildings
- Support Natural materials?

Need to prepare Regional Sustainable energy centres
– systematic long term planning and project preparation

How to go above A0 energy class from 2021

What is achievable by 2023-2026 (and what goes to MFF)?

Thanks for your attention!

National Recovery and Resilience Plans

Participation, transparency and democratic inclusion

- Consultation;
- SEA process;

Sustainable reforms and solutions

- EE first principle – (Deep)Renovation wave; EE first in RES spending;
- Exclusion of fossil gas, waste incineration;
- Transport – connected with other modalities
